

DoD RFID Policy Update

November 17, 2004

Kathy Smith | Office of the Assistant Deputy Under Secretary of
Defense

(Supply Chain Integration)

Agenda

- **RFID Vision**
- **RFID Policy**
- **Passive RFID Implementation Plan**
- **Benefits**
- **Next Steps**

Facing new challenges...

- Rapidly moving force on a dynamic battlefield
- Demand for better information on assets
- Need for more effective management of inventory

- Improve business processes now
- Influence the direction and cost of technology development
- Drive the standards to work for us
- Facilitate the implementation of Unique Identification (UID)

The RFID Vision

Implement knowledge-enabled logistics through fully automated visibility and management of assets in support of the warfighter

An enabler to the Integrated DoD Supply Chain

Cases/Pallets are labeled with passive RFID tags. Cases are associated to pallet

Manufacturers/Suppliers

Cases/Pallets are read as they are received and **new shipments are labeled**. Orders are verified for

Distribution Centers/Depots/TD Cs

Cases/Pallets are associated with **Active RFID** to provide TAV.

Commercial/Military Carriers

Data is timely and accurate via network of linked readers allowing asset visibility along the entire supply chain

TMO/Supply/Theater Depots

Customer

Timely and Accurate Data

When shipments are reconfigured a new **RFID Tag** is created for the pallet and associated with cases on that pallet

The **cases/pallets are automatically received** with few disputes and info is shared with the AISs. Reconfigured shipments

Customers have visibility of requisitions and **are confident** in the status provided by the system

July 30, 2005 Policy

Active RFID - freight containers, air pallets

- ***Long range, large amount of data***
- ***SAVI readers and tags***
- ***DoD tag data formats***

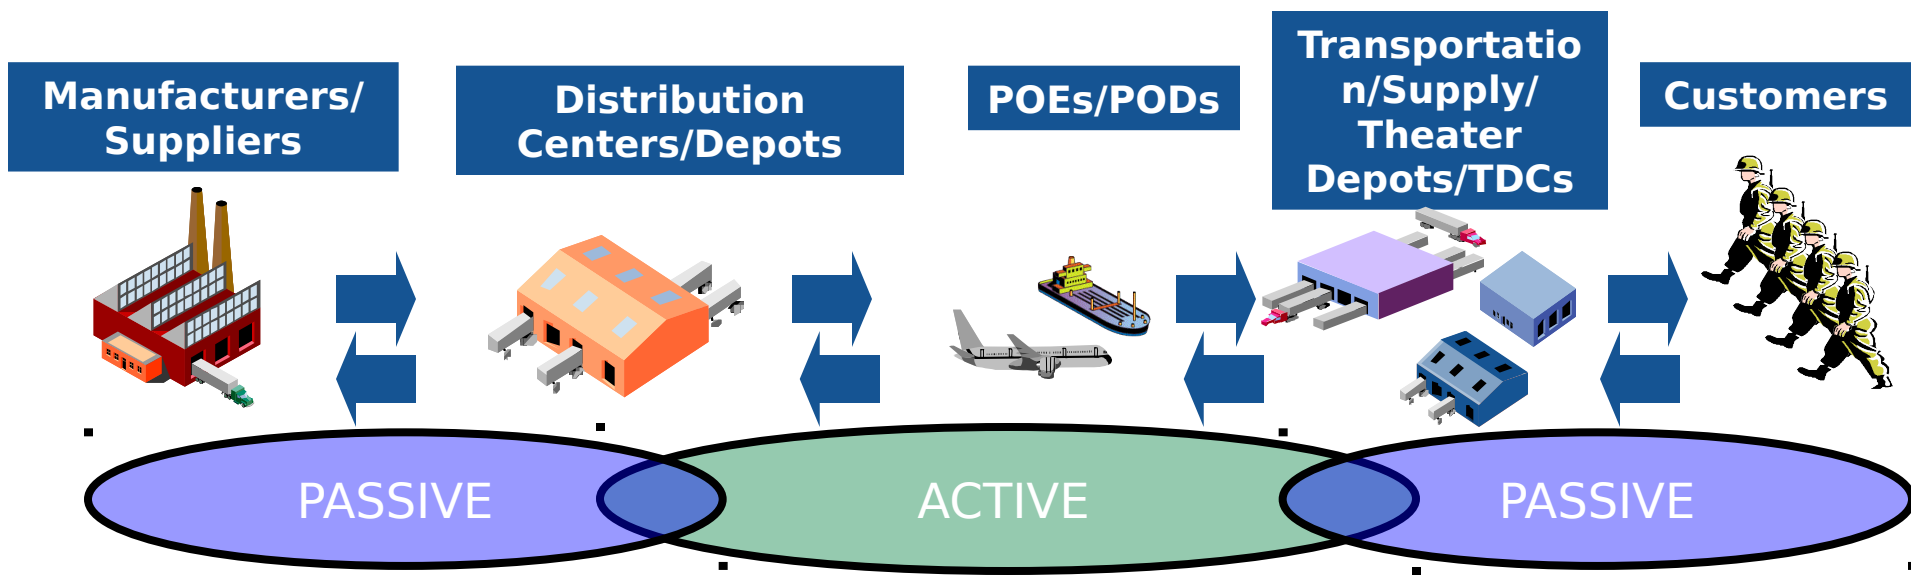

Passive RFID - case & pallet (all item packaging (UID items))

- ***Short range, small amount of data***
- ***EPC standard readers and tags***
- ***EPC and DoD tag data formats***

Complementary use across the logistics supply chain

Distribution Center/Depot (Sustainment)

8

Overhead scanner read the passive RFID tag.

7

Loose/Broken picks are processed using a similar method.

6

Full cases are directed via passive RFID and placed on the conveyer.

9

Cases are sorted according to the pallet indicated. Readers at palletization stations read the passive RFID as the cases are being palletized. Items/Cases are aggregated to the pallet.

10

A passive RFID tag is printed and attached to the pallet. If the pallets are placed on a 463L or in a container, an active RFID tag is produced and attached.

1

1

Containers, 463Ls, or pallets are shipped by reading the RFID tag and the AIS is updated.

1

An active RFID tag captures arrival at the gate.

2

Items/Cases/Pallets are received by scanning the passive RFID tag and the AIS is updated.

5

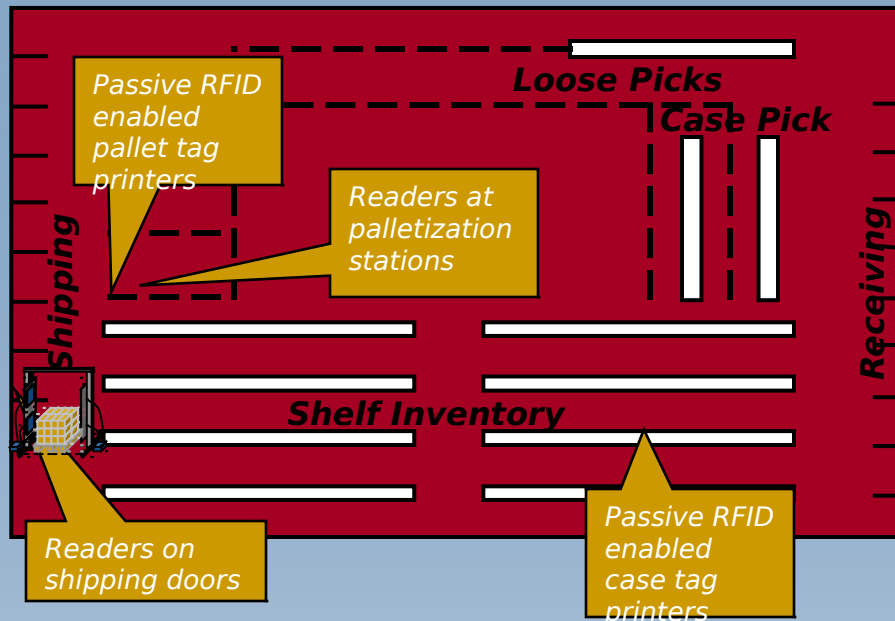

Full case picking tags are printed out with human readable information and barcode on the passive RFID tag.

4

Shelf readers read individual units on the shelf and update inventory in real time. Replenishment is automatically initiated when shelf inventory reaches a target level.

3

Item/Case/Pallet information is used for putaway. Similar logic is used for replenishment and moves.

Implementation Dates

- **Active RFID - Operational; Implementation Continuing**

- **Passive RFID**
 - **DoD - Implementation underway now**
 - **Suppliers - Effective Jan 2005 according to the *Passive Supplier Implementation Plan* published in**

Implementation Plan considers level of packaging

Palletized Unit Load Tag
YES – January 1, 2005 - 2006

Pallet tag

Exterior Container
YES – January 1, 2005 - 2006

UID Item Unit
No Pack* January 1, 2005 - 2006
YES January 1, 2007

Shipping Container
YES – January 1, 2005 - 2006

*If the UID Packaging is also an External Container or a Shipping Container, it will have an RFID tag

Implementation Plan considers commodities

Commencing January 1, 2005

- > Class I Subclass – Packaged Operational Rations & Packaged Food
- > Class II – Clothing, Individual Equipment, Tools, & Administrative Supplies
- > Class VI – Personal Demand Items
- > Class IX – Repair Parts & Components

Commencing January 1, 2006

- > Class I – Subsistence & Gratuitous Health & Comfort Items
- > Class III – Packaged Petroleum, Lubricants, Oils, Preservatives, Chemicals & Additives
- > Class IV – Construction & Barrier Equipment
- > Class V – Ammunition of all types
- > Class VII – Major End Items
- > Class VIII – Medical

Passive RFID Implementation Plan for

January 1, 2005

Classes of Supply:

- II, VI, IX, I (PORs/MREs)

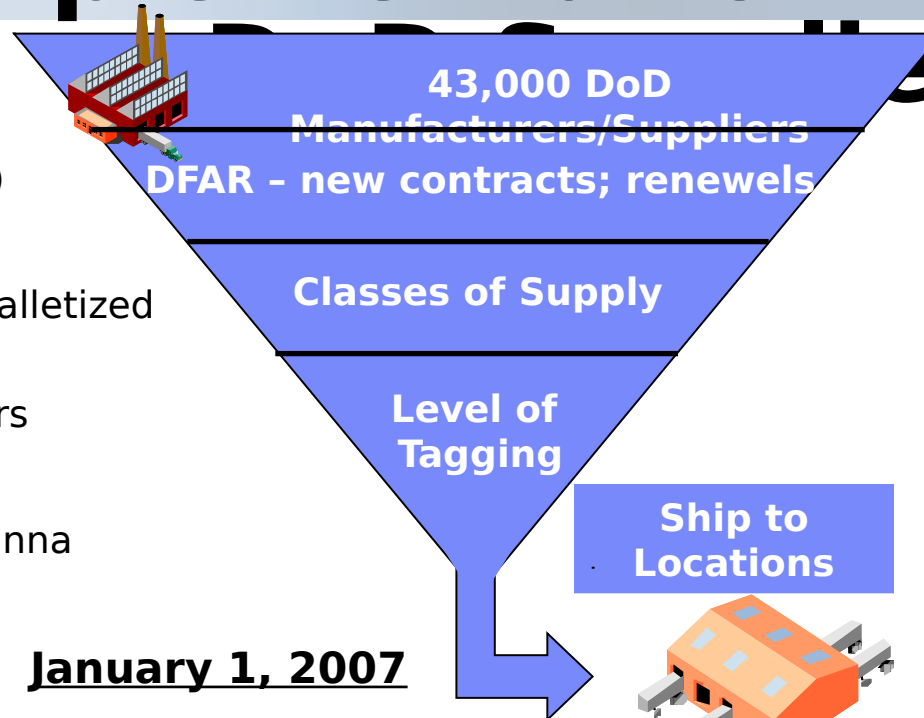

Level of Tagging:

- Shipping Containers, Palletized Unit

Loads, Exterior Containers

Ship to locations:

- San Joaquin, Susquehanna

January 1, 2007

Classes of Supply:

- All Classes

Level of Tagging:

- Shipping Containers, Palletized Unit Loads, Exterior Containers, UID Item Unit Pack

Ship to locations: All Locations

January 1, 2006
Classes of Supply:

- Begin All Classes

Level of Tagging:

- Shipping Containers, Palletized Unit Loads, Exterior Containers

Ship to locations:

- Strategic CONUS DLA Depots, TRANSCOM Facilities & Service Maintenance Facilities

DFAR Clause Details

- **Two Major Requirements for Suppliers**
 - Passive Tagging at the case, pallet, UID item packaging level in accordance with the Implementation Plan
 - Advance Ship Notice (ASN)
- **DFAR clause references the MIL-STD 129 for implementation details**
 - Definitions
 - Tag Data Standards
 - Tag Placement
 - Performance Requirements
- **A Supplier Guide that contains information that details requirements for compliance is located at www.dodrfid.org/supplierguide.htm**

Advance Shipment Notice (associate RFID/material)

- EDI 856
- UDF/FTP
- Web page form

Advance Shipment
Notice

**Manufacturers/
Suppliers**

WAWF

**Distribution
Centers/Depots**

Advance Shipment Notice 856 will
be a transportation based
transaction

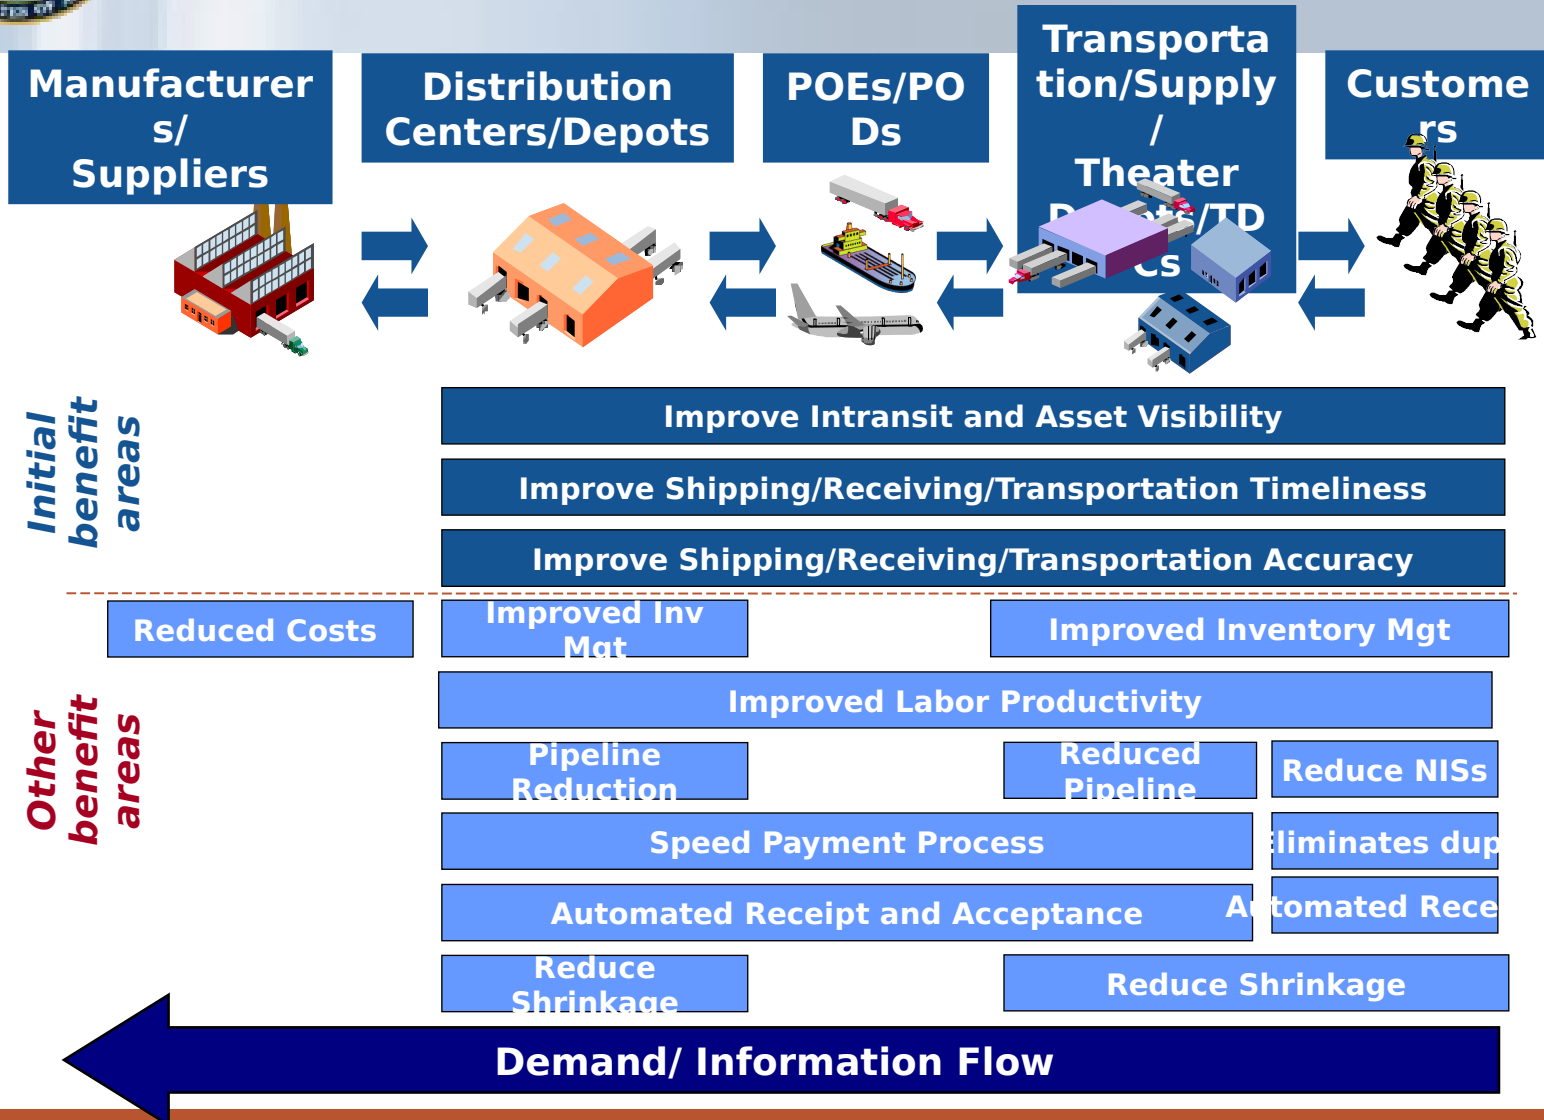

- Pallet

▪ External
Container

▪ CLINs

Benefits across the supply chain

Next Steps

- **Publish DFARS Rule for passive RFID**
- **Ready the Distribution Centers to receive tagged materiel**
- **Provide Education and Outreach to the Acquisition Community**
- **Perform Safety Certification Testing (HERO, HERF, HERP) for passive RFID**
- **Receive and Ship Tagged Materiel**

Back to the Future

“I think the industry has sold itself on a program that offers so little return that it simply won’t be worth the trouble and expense”

A Midwest Grocery Chain Executive discussing the potential of the barcode in 1975

BACK UP

UID vs RFID

	UID	RFID
Marking	Item	Packaging
Technology	2D Data Matrix	EPC RFID tag
Purpose	Life cycle data visibility	Supply chain receipt/track
Threshold	>\$5000, some	NONE

Separate but integrated initiatives
Different technologies
Different business rules
